Applicants' remarks and amendments, filed on October 3, 2006, have been carefully considered. No claims have been canceled; new claims 15-17 have been added.

Claims 1-17 are now pending in this application.

### ***Correction of Inventorship***

1. In view of the papers filed October 27, 2005, it has been found that this nonprovisional application, as filed, through error and without deceptive intent, improperly set forth the inventorship, and accordingly, this application has been corrected in compliance with 37 CFR 1.48(a). The inventorship of this application has been changed by deleting the previously incorrectly named inventor Mario J. Nappa from the inventorship.

The application will be forwarded to the Office of Initial Patent Examination (OIPE) for issuance of a corrected filing receipt, and correction of Office records to reflect the inventorship as corrected.

### ***Withdrawn Rejections***

The 112(2) rejection of claims 4-10 and 14 stated in the previous Office Action has been withdrawn in view of Applicants' amendments to these claims.

The provisional double-patenting rejection of claims 1-14 as being unpatentable over claims 1-14 of copending Application Serial No. 10/523,226, stated in the previous

Art Unit: 1755

Office Action, has been withdrawn in view of Applicants' persuasive arguments traversing this rejection.

The 102(b) rejection of claims 1-6 as being anticipated by Bruhnke et al. (U. S. Patent No. 5,177,273) stated in the previous Office Action has been withdrawn in view of Applicants' amendments and persuasive arguments traversing this rejection.

This reference does not reach or reasonably suggest that the cobalt employed as modifier in Patentees' catalyst replaces chromium atoms in the chromium oxide lattice, as recited in Applicants' claims.

The 103(a) rejection of claims 11-14 as being unpatentable over Tsuji et al. (U. S. Patent No. 5,494,873) stated in the previous Office Action has been withdrawn in view of Applicants' amendments and persuasive arguments traversing this rejection.

Tsuji et al. teach away from using air and/or oxygen for calcining, as is now recited in the instant claims. See col. 4, line 63 to col. 5, line 14.

#### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Heiser on December 11, 2006.

***The application has been amended as follows:***

Art Unit: 1755

***a. In line 1 of claim 1, after the word "crystalline", please insert the phrase  
--cobalt-substituted--.***

Claim 1 has been amended to ensure proper antecedent basis.

***Allowable Subject Matter***

3. Claims 1-17 are allowed.

***Reasons for Allowance***

4. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest the claimed crystalline alpha-chromium oxide, where from about 0.05 atom % to about 6 atom % of the chromium atoms in said alpha-chromium oxide lattice are replaced by trivalent cobalt atoms.

The prior art also does not teach or suggest the claimed processes (1) for changing the fluorine distribution in a hydrocarbon or a halogenated hydrocarbon, and (2) for increasing the fluorine content of a halogenated hydrocarbon compound or an unsaturated hydrocarbon compound, said processes comprising bringing said cobalt-substituted chromium oxide into the presence of hydrocarbon or halogenated hydrocarbon, or reacting said hydrocarbon or halogenated hydrocarbon with hydrogen fluoride in the presence of said cobalt-substituted alpha-chromium oxide.

The prior art also does not teach or suggest the claimed process for producing the crystalline cobalt-substituted alpha-chromium oxide.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
